

## Press Release

Milan, July 30<sup>th</sup> 2019 – Nexi states that its security services have detected the publication on a foreign website of an anonymous post containing a list of about 18 thousand names (name, surname, address, social security number and, only in a few cases, an unverified telephone number) that such anonymous source claimed to refer to Nexi customers.

None of the published data contained financial information (eg: card numbers, transactions, identification codes, pins, passwords, etc., etc.).

Nexi furthermore states that at this time:

- no breach of any of its IT systems has been detected and no data relating to payment cards managed by Nexi has been compromised in any way;
- in many cases the personal data published on the website does not match the records contained in Nexi systems;
- following Nexi's immediate injunction against the website in question, all the data were promptly removed.

Nexi informs that it reported the fact to the competent authorities immediately, and that it reserves its rights to carry out any further action aimed at protecting its interests.
