

NEXI GROUP: ACH WITHIN SEPA

There are 3 types of participants in the ACH of the NEXI Group:

1. Primary direct participants;
2. Secondary direct participants (*);
3. Indirect participants.

The fee structure for SEPA transactions (Credit Transfers, Direct Debits) includes both a fixed sum, relating to essential and mandatory components of the cost of the service, and a variable fee depending on the actual cost of incoming and outgoing transactions.

The fee structure complies with the principles of transparency and optimization guiding the administrative activity.

Fees are broken down into payments sent and received since the ACH is an open system capable of communicating with other European ACHs. Therefore, a payment originating from a system may be settled through another one. This ensures that the system is fair.

Fees are applied per banking group.

Such fees are based on the duration of the contract signed with the banks participating in the ACH of NEXI Group.

The duration of the contract is one year.

The fees for participating in the system are broken down into two charges, plus a one-off sum to be paid when joining the ACH or when withdrawing from one of the services.

- Entry fee (one-off when joining);
- Annual fixed fees;
- Transaction fees.

(*) belonging to banking groups and thus not settling directly.

TRANSACTION FEES

Transaction fees are linked to the volume of payments sent and received by PSPs and are based on the quarterly average number of transactions carried out on a daily basis. Messages sent to and received by the ACH are subject to a fee. Payments are invoiced quarterly.

Transaction sent	€ 0.009
Swift costs	€ 0.0015
Transaction received	€ 0.007

SEPA DIRECT DEBITS (CORE & B2B)

Furthermore, in case of large committed volumes or multiannual contracts, the PSP may opt for better price terms through the application of progressively decreasing transaction fees. The transaction fee for payments sent and received will be determined based on the target aggregate volume as agreed.

Fees mentioned above do not include connection and network charges for sending and receiving messages (SCTs and SDDs).
